Work Experience

Microsoft – Riyadh, Saudi Arabia

Senior Customer Engineer (Jul 2020 – Present)

Senior Customer Engineer – App Innovation

Provides a deep technical support for Enterprise customers to deliver unique value by removing blockers to consumption within their given Solution Area. Also provides technical support including risk assessments and tuning to operate and optimize a customer's cloud or on-premises environment. I cover the following technologies/areas: - Microsoft Azure Platform (PaaS) - DevOps & Secure DevOps - Application Development & Development Tools.

Premier Field Engineer (Jan 2016 – Jun 2020)

Premier Field Engineer: Application Development

PFE delivers onsite, remote and dedicated support services for Premier customers around the world to promote health in their IT environments. As part of Customer Support Services, PFE partners with Commercial Technical Support and Enterprise Services to strengthen the Microsoft Services field engineering capability worldwide.

SURE International Technology – Riyadh, Saudi Arabia

Team Leader (Jul 2013 – Dec 2015)

Create and document detail designs that meet the product requirements, implement the design and review designs and implementation with the team and customers for acceptance early in the development process. Ensure that all designs and implementations confirm to both functional and technical design specifications, have highest quality, are well documented and maximize performance, availability and serviceability.

Responsible for managing (Leading, installing, customizing and deploying) the following so far for the past years in the company: +5 SharePoint portals, 1 huge MS CRM instance, +5 E-services and 1 huge E-service for 7 workflows involving using BPM engine like K2.

ITWORX – Cairo, Egypt

Senior Software Engineer (Nov 2012 – July 2013)

Responsible for designing, executing, assessing, and troubleshooting SharePoint and .NET applications which include: configuring, analyzing, designing, coding, developing, unit testing and documenting software specifications throughout the project life cycle.

Contributed in the estimates of the project, the quality and timeliness of the deliverables and the project's compliance to the organizational processes and standards.

Sure International Technology – Cairo, Egypt

Technical Team Lead (May 2012 – Nov 2012)

Responsible for creating and documenting detail designs that meet the product requirements.

Implemented the design and review designs and implementation with the team and customers for acceptance early in the development process.

Ensure that all designs and implementations confirm to both functional and technical design specifications.

Developing and executing tests that prove that their design and implementation meets the system requirements and to ensure robustness and highest quality, review and test code of software engineers.

Provided technical and career development coaching and mentorship to Software Engineers and Senior Software

Helped the company to achieve **CMMI Level 3** by playing a major role in the EPG (Engineering Process Group).

Senior Software Engineer (Jun 2011 – Apr 2012)

Developed multiple systems and portals using Microsoft Technologies using (ASP.NET/SharePoint/SQL) starting by the architectural design to the user acceptance test. Contribute in preparing a checklist to help the developers achieve the correctness of written code and provide some useful tools to make easier to check against that checklist.

Salis IT Services – Cairo, Egypt

Senior Web/SharePoint Developer (Jul 2005 – May 2011)

Participate in the development of the two big products of the company in the field farming plus other small web applications.

Build the company internet portal using Microsoft SharePoint along with some workflows to help the departments in the company achieving their tasks easily.

Responsible for the company networks for my first year based on my previous the network administration skills side by side with the development tasks.

Sekem – Cairo, Egypt
